

# Art Project

BY : Indigo Harris

## “Fashion of the Present”

“A collage of what the fashion of the present time is like.”

I choose this project because we had to create a project that represented the future , past or the present and I choose fashion to represent what the present is like.

# Painting

A painting of colors transferring into a blue base.

I choose to do this painting because I had to create a painting with a theme that I found online, I created this to try to learn new teaching and try to learn how to work with different paint then what I was use to.

**How have you grown as an  
artist ?**

I think I have grown as an artist  
because I am now comfortable with  
creating art and with letting my  
artistic abilities come out.

---

## What have you learned about making art?

I learned that there is no “perfect art” art is what you make it , and that there are no mistakes in art.

---

**What have you learned about yourself through the projects you have created ?**

I have learned that I know how to do more than I thought when it comes to art. I also learned not to sell myself short because I can do anything I put my mind to.

---

**Which project are you most proud of?**

I am most proud of my fashion collage project. I was able to show my eye for fashion and try to cover present fashion in one project. I loved the outcome of this project.

---

**What kind of art inspires  
you the most and why ?**

The kind of art that inspires me most is the kind of art I can relate the most too. I like art that makes me think and figure it out as well.
