

DRIVING WHILE BEING BLACK

Here is a list of proof that African Americans are treated differently than Caucasians and often treated as where they were criminals more often than whites.

SURVEILLANCE

It is proven by multiple studies that if you're white, you don't usually need to worry about being monitored by the police. But the day-to-day reality for African Americans is quite different.

FIFTY PERCENT?!

Statistics show that this is a bigger issue than most people think, over 50 percent of African Americans reported knowing a victim of police harassment or violence in 2009 and more African Americans know someone who has been harassed by the police.

IF YOU'RE WHITE YOU'RE DRIVING RIGHT! (ALEAST ACCORDING TO THE POLICE)

Statistics also show that black drivers are about 30% more likely than whites to be pulled over by the police. (So African Americans can expect to be monitored wherever they go) and whites are significantly proven to be less searched than people of color.

"WALKING WHILE BLACK"

Blacks are also twice as likely to die in pedestrian accidents than whites, perhaps because, according to one study, motorists are less likely to stop for blacks in the crosswalk. In the study, it was proved a black pedestrian's wait time at the curb was about 32 percent longer than a white person's.

STAY WOKE!

Diving in a little deeper now Muslims are in the same boat; Muslims are under increasing and often illegal surveillance just as African Americans are. Both of these groups sharing the same prejudice and negative stereotypes that result in discrimination in our society.
