

DANGER!
TSUNAMI!

TSUNAMI:

WARNING SIGNS

If you experience an earthquake while you live near a major body of water. Get to higher ground. Earthquakes are natural signs for a tsunami.

Receding or rising water depths are also common signs of a tsunami.

A tsunamic incoming is commonly described as a loud freight train.

Keep a listen to the authorities. Tsunamis can come in more than one wave. These waves can be from 5 minutes to an hour apart.

Prepare food and equipment for natural disasters like this. Tsunami's can impact infrastructure like roads and power grids
