

Tech & Society Timeline

Caliyah & Leonard

1965

The reason why the year 1965 matters is because it was the start of technology. This event had impacted society at that time because of the two computers having packet-switching technology to communicate with each other. This year improved on people's lives because it gave people an opportunity to apply for jobs and for people to communicate from afar.

1974

1974 matters because the first ever internet service provider known as the ISP was born 1974. ISP improved peoples lives because it allowed people to communicate with others from a distance. The impact that it had on peoples lives today was both bad and good because lots of people could track others addresses and find them. It impacted society because the fathers of the internet had published the design of TCP.

1997

It improved people's lives by the PC makers were able to hide or remove internet software on new visions. It impacted our society today by announcing that the browser will be free. It impacted the aspects of our society by having new visions and the department helping them.

2005

The year 2005 matters because a new website youtube launches which gives other people entertainment. The impact that it had on society is that we have information on how youtube was found. This impacted the aspects of society by having millions of videos for entertainment for adults and kids now.

2010

2010 impacted on peoples lives because facebook users lives. The impact that it had on society today is that we could find information around the world. This year had an impact on peoples lives because it had a world wide amount of people on the app.

2021

By 2021 there were about 4 million people connected on the internet. The impact it had on people's lives is that kids and adults can use the internet for work, school, entertainment, etc. This year had impacted the aspects our lives by people could now feed their kids and get jobs from the internet which could prevent people from getting sick.
