2022

THE INTERENT WORLD NOW

Low earth orbit satellite internet is closer to reality. By early january 2022. But the spaceX launches more than 1900 starlink satellites overall.

Technology & Society

After spending this quarter learning about technology and society, we can answer these two important questions. Does technology reflect society and culture or shape it? Technology is something that is introduced into society, and the culture reacts to it in either a positive or negative way, and this changes frequently. As culture frequently changes, so does technology. Is technology always improving our lives? Technology is a win/lose situation. Technology is a tool and not a toy. Technology is not good for use when it is harmful to someone. Technology can be dangerous when it isn't used properly, or by the right people. When technology is used for the greater good of people, it can add to society and be helpful.
