

Technology & Society

1972

BBN'S RAY TOMLINSON

Ray introduced the network email/ the internet working group. This made a big impact because it introduced people to new things.. This also made a big impact now because a lot of people use it for their current work.

1987

CISCO

The number of cisco's hosts on the internet exceeds 20,000. Also, they ship their first router. This improves society's current living because this speeded up people's internet.

1990

1992 VIDEO MAKING

in 1992 the concept of sound and videos are distributed to the people where it got popular fast.

2000S

2004 FACEBOOK GOES ONLINE

in 2004 is when facebook was released to the world and this what led to it becoming popular with the people and becoming a while now and became the start of social networking

2020

2022 INTERNET IS CLOSER TO REALITY.

over 1,900 satellites were launched into space by spacex all over the world so constellation is now providing service in select areas around the world that wasn't able to get service.

"I think our data point to the importance of being consciously aware of attentiveness," he says. That reflects it because technology it's important to society to use the internet. Technology does improve our lives because it's resourceful. But most of the time it's not because people always think they can turn to technology when the info is right in front of them. At the end of the day though it does improve our lives because when we are stuck we can turn to technology. Although technology may not always be a good use, it's still necessary. Use technology and be great.
