

## Summary

The evolution of the internet and technology allowed the progression of many things. Some of those things included communication, social media, online shopping, and etc. We choose these topics because we thought that they created /change the internet in the biggest ways. Some of those topics included The launch of youtube, The domain name system, The launch of the world wide web, and etc. For example, The launch of youtube originally was meant to be a dating site but has evolved into an app that helps us build things, tie our shoes, and listen to people ideas. Some positive affects of the internet have been enhanced communication, promoted education , and its helped with development(<https://thriveglobal.com/stories/positive-and-negative-effects-of-the-internet-on-our-daily-lives/>). Some negative effects is that it causing mental issues such as verbal abuse and cyber bullying, physical abuse, and poor posture .The internet and technology has impacted our lives and how we go about our day to day life (<https://www.medicalnewstoday.com/articles/negative-effects-of-technology#physical-health-effects>).
