

Air Pollution

- Summary

The Main focus of my PSA is to help stop and lower water pollution. Is a video showing all the animals dying and pictures of people who are less fortunate and how their waters are affected?

- Air Pollution is the contamination of air from substances that are harmful to the health of humans and animals
- Air Pollution is also the 4th leading cause of death
- Air pollution not only affects people and animals, it also affects the food that we eat.
- Air pollution doesn't only come from smoking and factories but also from dust, fuel, chimneys, fireplaces and so much more.
